

Tobi Ghost - kklogos13@gmail.com
Kansas City, MO 64132

Full Stack, Python Developer, Data Engineer, Software Developer

Professional Summary

I always put forth my absolute best and can find fun in whatever I do. Pressure might count as a challenge to some and I enjoy a challenge. So in tight spots or meeting short deadlines, I prove reliable and dependable every time and will meet every occasion with the same motivation and enthusiasm. Group environments are very comfortable, but me being a leader, working alone is not a problem either. My objective is servicing my community and employer and to be known for my work ethic.

Work Experience

IT Manager

Garcia Family Medicine - Blue Springs, MO

Managed and maintained the organization's technology infrastructure to ensure operations and efficient workflows. Setup and maintained new cloud storage solutions that helped save thousands of dollars every year, and troubleshooting hardware and software systems that have improved the day to day tasks for the organization. Managed networks, ensuring HIPAA data security, and improved system performance. Collaborated with previous teams to iron out previous issues, provided technical support, and deploy solutions that aligned with business goals.

Software Developer

Menlo - Kansas City, MO

Integrate legacy systems into an API to help simplify processes and visualize progress and information for clients and employees. Working with Python to create API's, SQL and SQLAlchemy to create databases and create Excel and CSV for comfort of certain employees. Using Flask to create a web app to make a seamless UI to help increase productivity.

Inventory / Python Developer

Davis Auto Repair and Tow - Kansas City, MO

Developed an inventory system to automate the inventory systems, online store, and distributor management and created a system to coordinate these tools. As the project evolved, I maintained and expanded its functionality by implementing user interface and creating and connecting API's and SQL databases to allow quicker on boarding for new employees.

SKILLS: HTML, CSS, PYTHON, JAVASCRIPT, MYSQL, FLASK, DJANGO, EXCEL, MACHINE LEARNING, DATA VISUALIZATION, GIT, DOCKER, NGINX, GOLANG, RUST, LINUX
